Briana

It's really interesting that all the averages are so close to each other

Number of Texts vs. Class Standing

The average amount of texts sent by each class type seem to be within close proximity to each other.

It seems like sophomores have a higher variability with their error bar, I wonder if we just have a lot more sophomores to work with, I noticed we only have 1 freshman. -Ellio

Elliot - its because of the one person with 200 texts :) chantelle

Number of texts sent in an average day vs. Class Standing

**Elliot
Johnson**

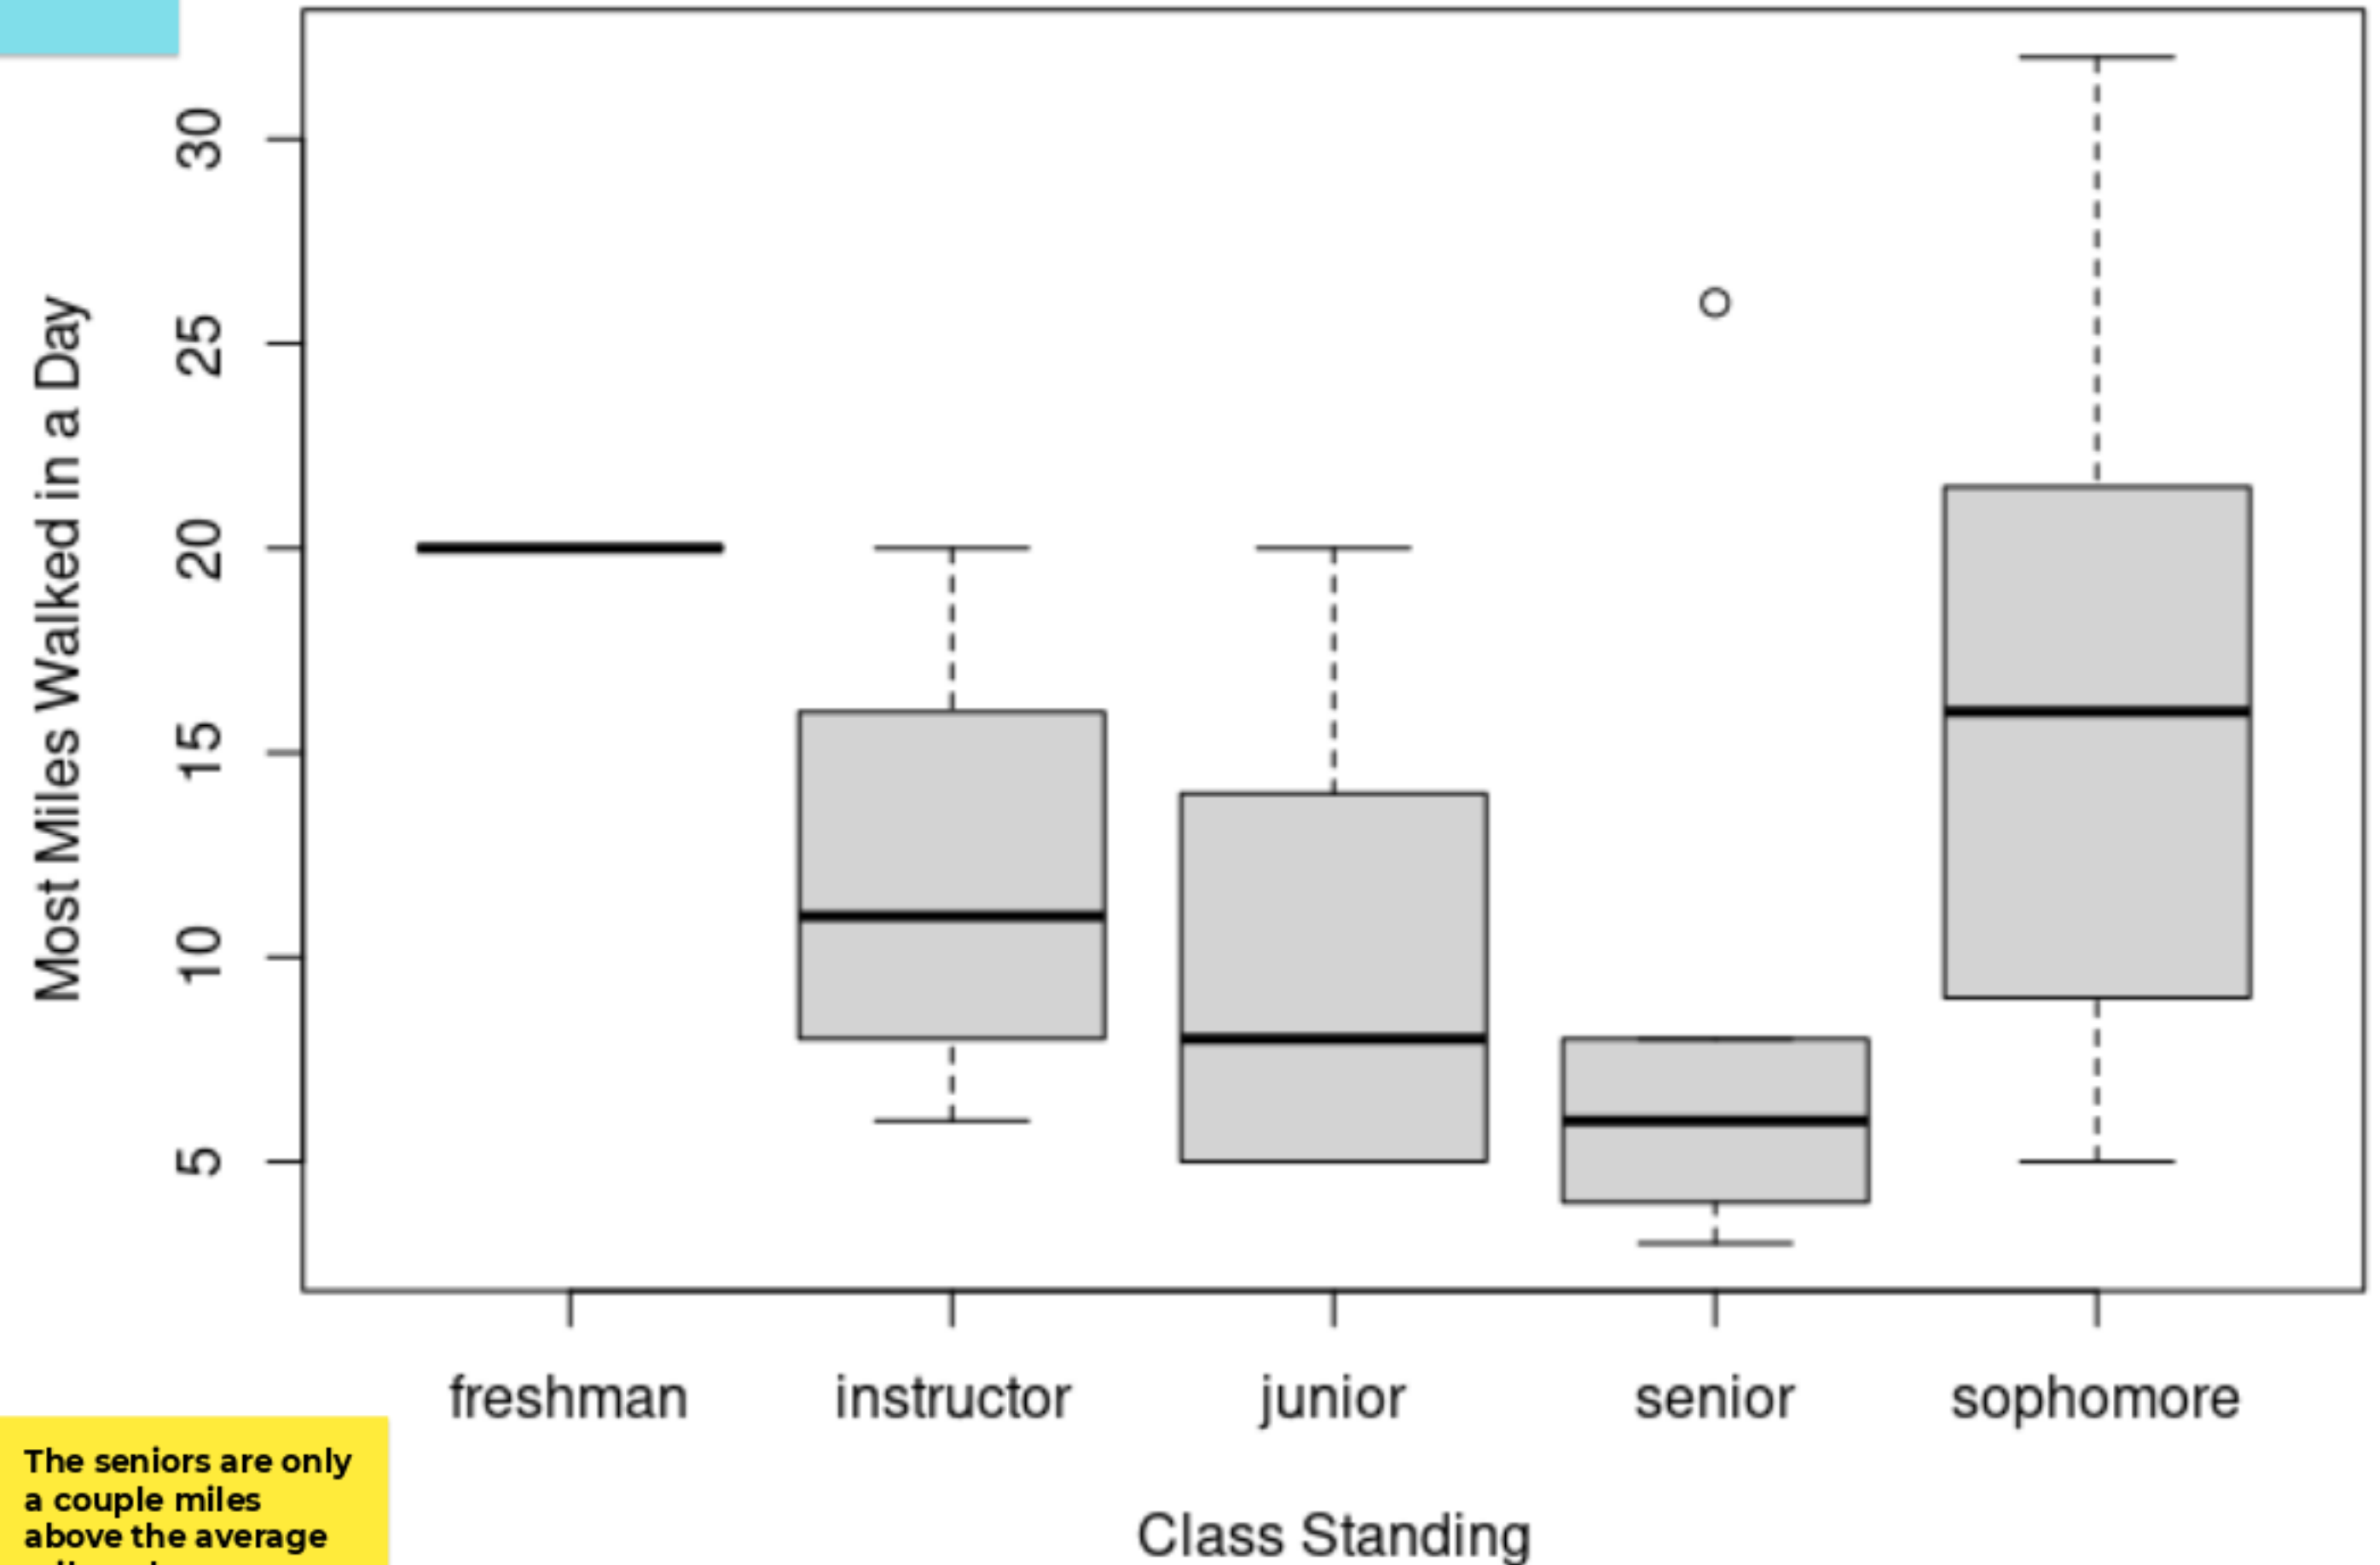

Seniors also seemed
to walk the least in
comparison to the
other class
standings, your data
looks very fun. -
Briana

The sophomore
variability is insane
compared to the
other groups

**This graph compares
the most miles
walked in a day
between different
class standings.
Sophomores seem to
have highest
variability between
groupings.**

The seniors are only
a couple miles
above the average
miles a human
usually walks in a
day. It's interesting
to see the variability
in the sophomores
data chantelle

Most Miles Walked by Class Standing

I feel for the person who only got 4 hours of sleep the previous night. They also seemed to send the most texts. - Briana

Isn't the point with 200 texts also the one who spent very little time on their phone? chantelle

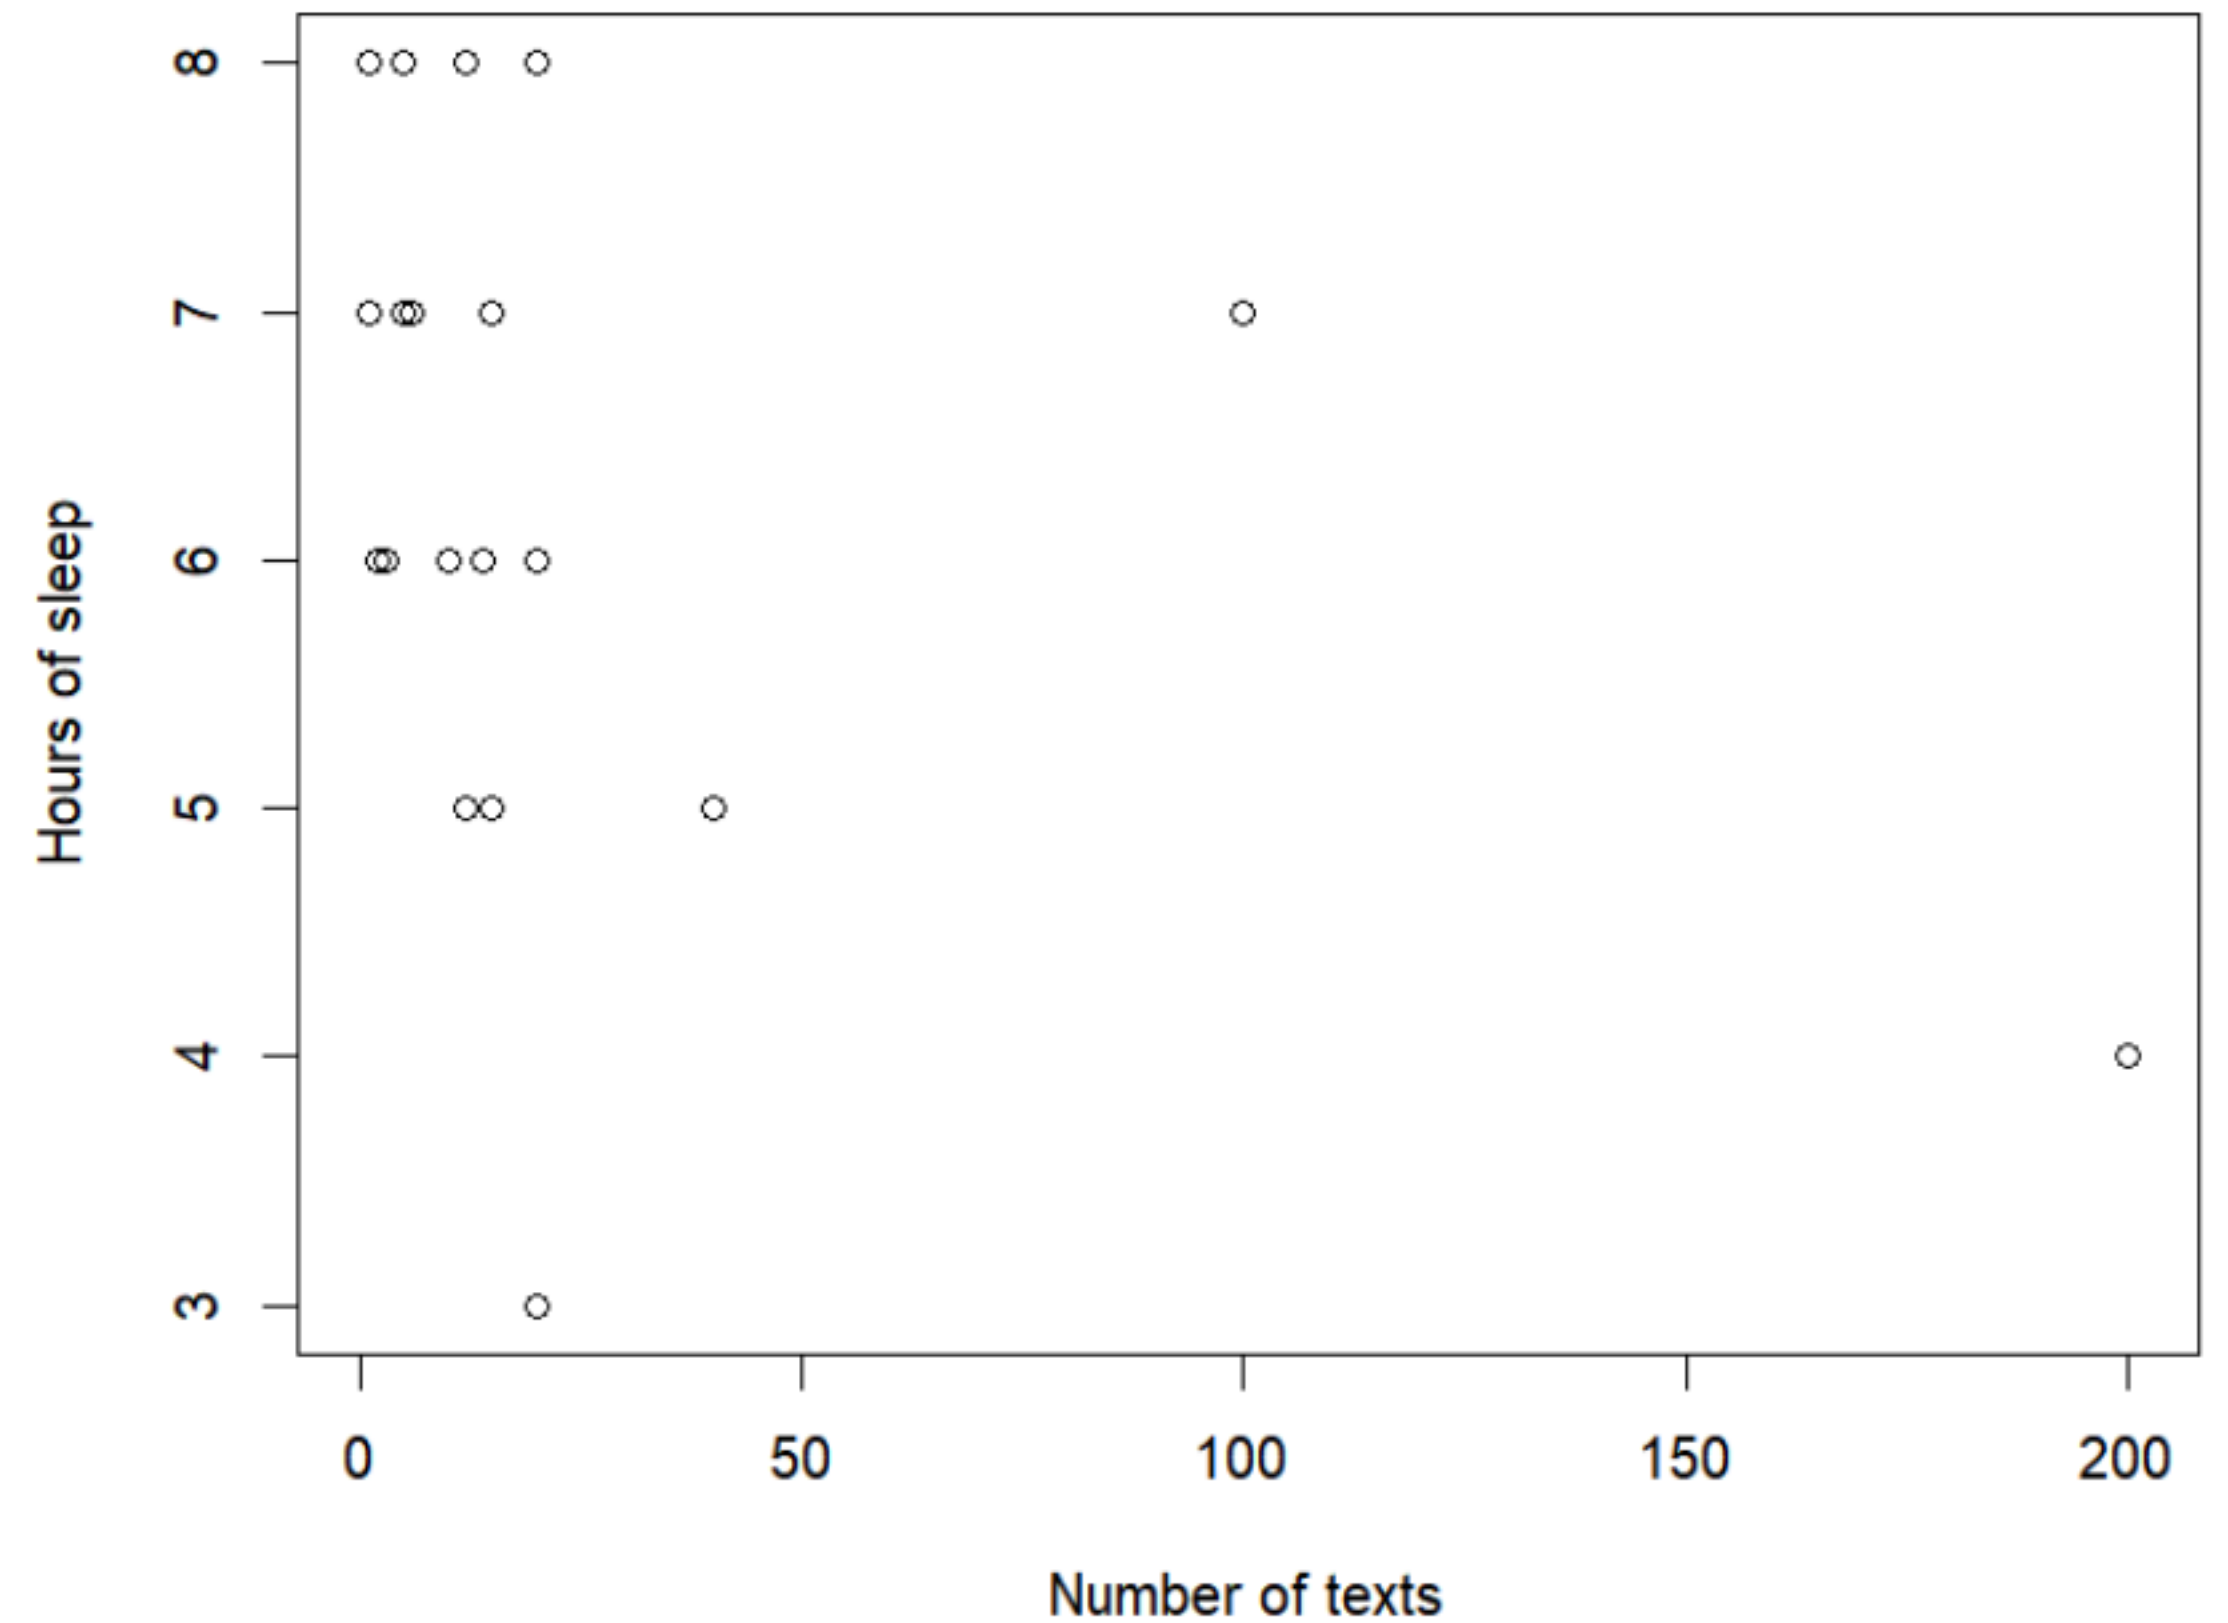

Chantelle-marie

I love how all of the data points are relatively similar except for the 200 out on the right haha

It LOOKS like there's a downward trend with that one person near the beginning as an outlier but I wonder what the stats say - Elliot

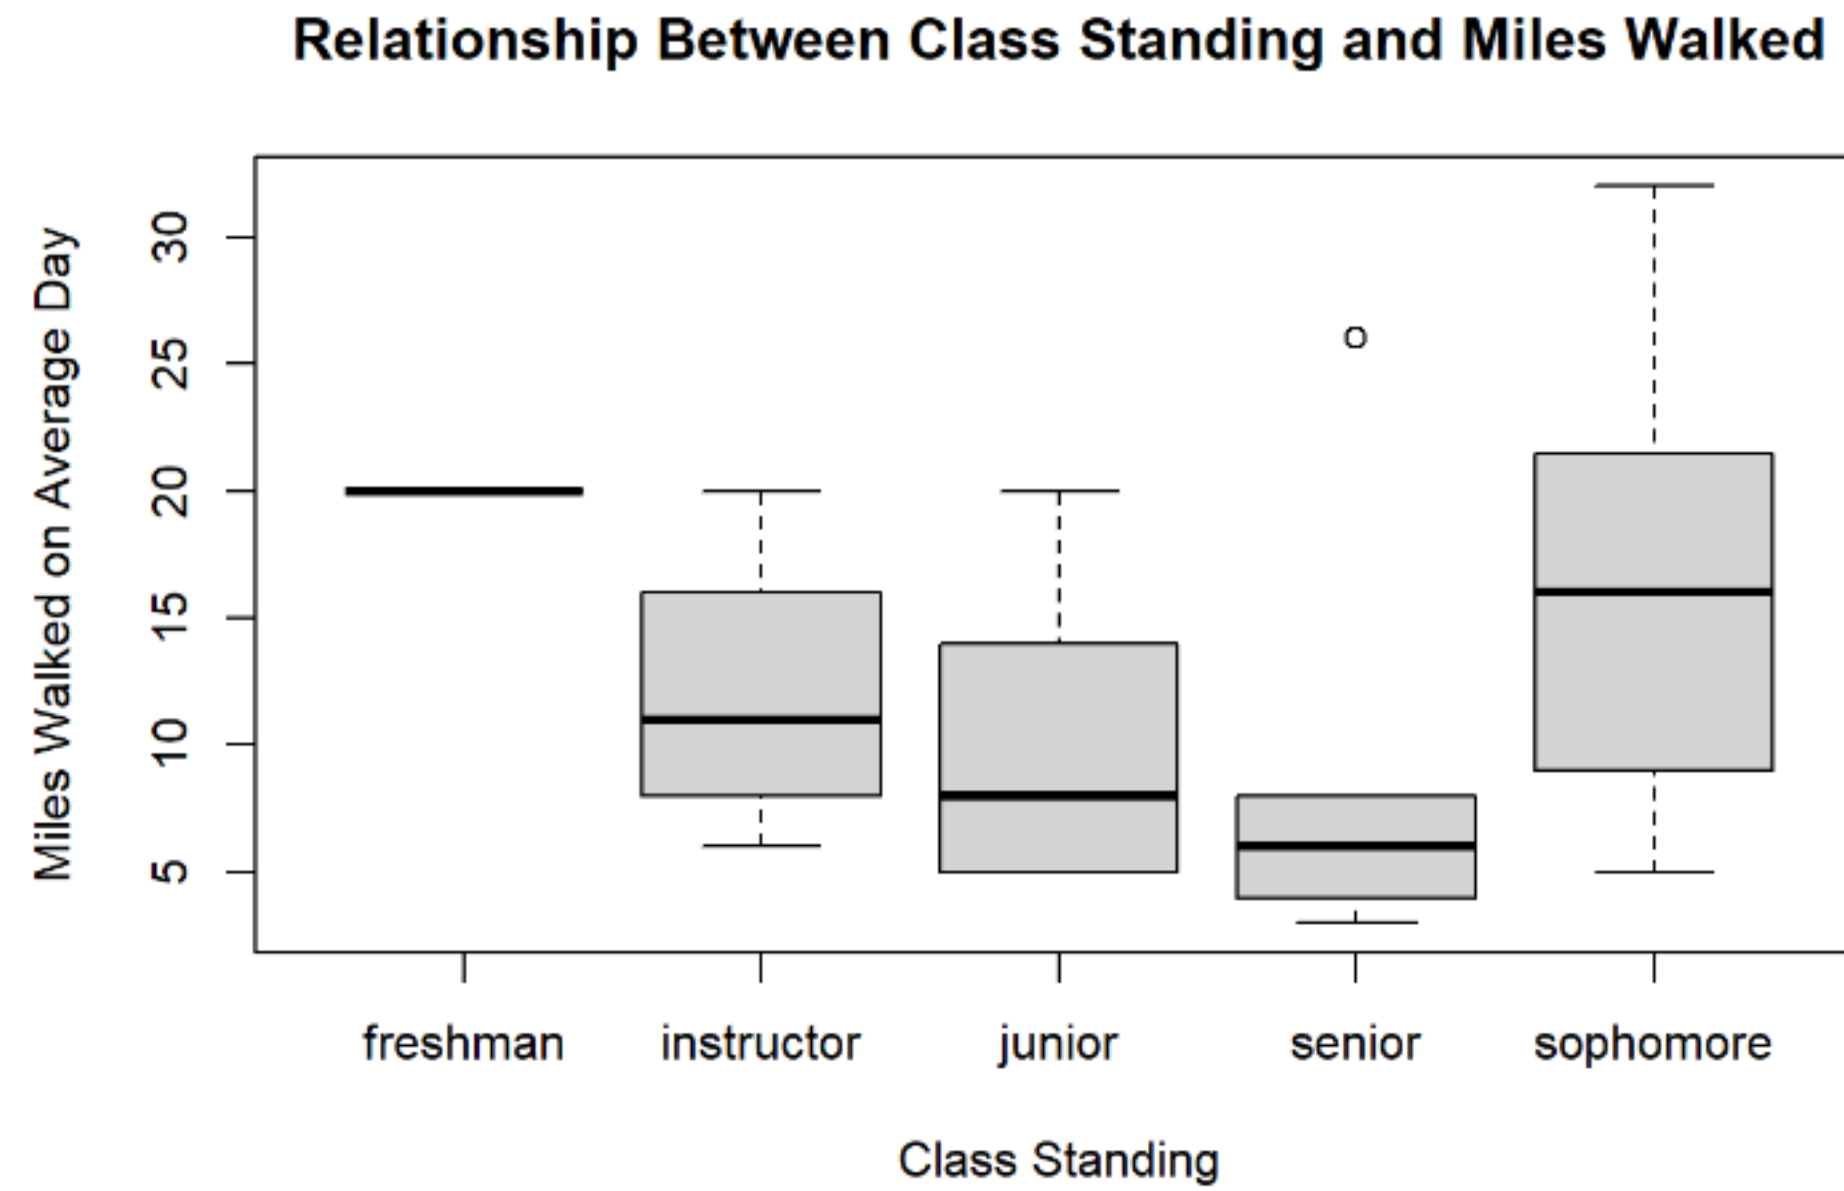

There is no correlation between the hours a student slept and the number of texts they send. The majority of the students sent between 0-50 texts, regardless of hours slept

Hours slept Vs number of texts

Megan

**On average,
freshmen
walk the most
miles**

**Love that one
senior student
at 25 miles :)
chantelle**

**It's interesting how
there seems to be a
steady decline of
miles walked by
class type. - Briana**

**We only have one
freshman so that
might be what's
skewing the data. I
always want more
data ;- - Elliot**

**Briana - Less
free time
maybe?
chantelle**
